

100M2SMU

Max 2 Mount - Fits All Bus Seats

IMPORTANT INFO

- Meets FMVSS213 when used with Max 2 Vest.
- Use only with EZ-ON Vest. Compatible Vest include: MAX 2
- Use on school bus seats that have entry between the seat bottom and seat back.
- **WARNING!** This restraint must only be used on school bus seats. Entire seat directly behind must be unoccupied or have restrained occupants.
- Register this product to be notified of a safety recall.

WARRANTY

EZ-ON Products stands behind the products we make. Warranty covers any defects in material or workmanships under normal use during the warranty period. We will repair or replace product defects for 1 year from manufacturer date.

WARNING

Death or serious injury can occur if manufacturer's instructions are not followed correctly. All EZ-ON products are dynamically tested to meet NHTSA standards. Please follow washing instructions on product tag. Replace product if it is damaged, frayed, or has been in a crash. Recommended replacement after six years. EZ-ON Products are not liable for injury if these recommendations are not followed.

EMERGENCY RELEASE PROCEDURE

When evacuating the passenger in a safety vest, the vest webbing is never cut. Three cuts of the portable seat mount webbing below the buckle and adjusters will allow the passenger to evacuate the bus wearing the safety vest.

Max 2 Mount - Fits All Bus Seats

INSTALLATION INSTRUCTIONS

1. Unlock seat and lift up
2. Hang shoulder straps from top of seat
Note: The longer tether hooks
3. Close bus seat. Allow hip tether hooks to extend on the bus seat.
4. Connect push button.
Note: Face of Push Button should be against the bus seat back.
5. Adjust length of seat wrap at the bar slide, so that all of the tilt adjusters are lying flat against the seat back.
6. Back thread loose end of webbing through bar slide.
7. Pull webbing tight at the push button. Mount strap must be tight without slack
Note: Webbing should be tight enough to create a crease on the top of the bus seat.
8. Properly seat Passenger
Note: Hips low against the back of the seat and shoulders flush to the seat
9. Attach hip level tether hooks to the hip level D-rings on the Vest.
10. Tighten hip strap by pulling on the webbing through the tilt adjuster on the back side of the seat.
- 10a. Hip level D-rings should sink into the seat bite.
11. Loop shoulder strap through d-ring at the shoulder level on the vest.
12. Hook shoulder strap to D-Ring on the back of the seat.
13. Tighten shoulder strap by pulling on the loose webbing.

Note: Repeat steps 11 – 13 for second shoulder strap.
